

Helium Hovercraft

Materials:

- Helium balloons (5)
- An elf-sized basket
- 5 pieces of string cut evenly (approximately 12 inches long)
- Scissors
- Tape

Instructions:

Your scout elf wants to make a grand entrance today by floating in on a helium hovercraft! With the materials above, your elf will:

1. Tie together a bunch of helium balloons using one of the pieces of string (trim it if necessary).
2. Tie the other pieces of string to the four corners of the basket, and tie each of the loose ends in one central location to the group of balloons to ensure the basket floats in evenly.
3. Print the "Up, Up and Away" sign above, cut it out and use tape to connect it to the front of the basket.
4. Glide into your home in style!
