

Hot Air Arrival

Materials:

Paper lantern (assembled)
Ribbon
Fishing line
Small basket
Foam snowflakes
Scissors

Instructions:

Incoming! Your scout elf will float in to surprise your family using a homemade hot air balloon that's just the right size. Once they have the materials above, your elf will:

1. Use festive ribbon and glue to decorate the creases in the paper lantern.
2. Use glue to attach foam snowflakes to the lantern.
3. Attach four strands of ribbon (approximately 8 inches long) to each of the four corners of the basket.
4. Attach the other ends of the ribbon to the lantern.
5. Use fishing line to steady the hot air balloon on an object high above the ground so that it comes in for an even landing.
6. Print out the "I'm Back" sign above, cut it out and use tape to attach it to the front of the basket.
7. Hop in the hot air balloon to glide on home!
