

Catch the Wind

Materials:

- Color printer
- Paper
- Scissors
- Tape
- Glue dots
- Hole puncher

Scout Elves at Play™ Tools

- Glacier Grips
- Holiday Harness
- Candy Cane Cable

Instructions:

This one's a breeze! Using a few household items and tools from the Scout Elves at Play™ kit, your scout elf will:

1. Print out the kite and bows and cut them out along the solid lines.
2. Use tape to attach a piece of Candy Cane Cable to the back of the kite that hangs down approximately 6 inches.
3. Attach the bows to the tail of the kite using glue dots.
4. Punch a hole in the top of the kite.
5. Hang the kite on a Glacier Grip using the hole at the top of the kite.
6. Get into position on the window by using the suction cup on the Holiday Harness and grabbing a hold of the tail of the kite! (Helpful hint: the Holiday Harness and Glacier Grips work best on smooth surfaces, like mirrors or tile!)
